Sample A

Sample B

You're looking at two beads of developer, magnified under a scanning electron microscope. Can you tell which would yield better print quality?

Only one passed IBM's battery of tests for quality and consistency (see answer below). The other, while good, had the slightest potential for producing

One met IBM's tough standards. The other did not. Can you tell the difference?

less than perfect print...which was simply not acceptable to IBM.

The electron microscope is just one tool for what we call Statistical Process Control. It helps us minimize any variation in our products...to give you the best performance from your IBM Supplies, day in and day out.

It all starts when we order our raw materials. We insist that our vendors agree—in advance—to provide material that fits within a rigid set of parameters. If they don't meet these requirements, those materials don't see the inside of our plant.

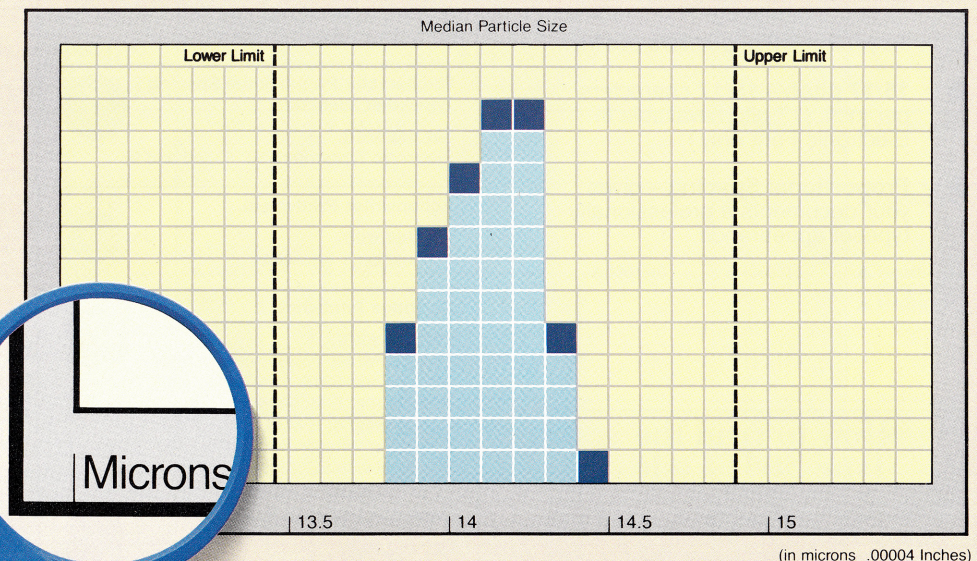

From that point on, our supplies are tested through every step of production...and retested, to make sure that whatever we're making—toner, ribbons,

diskettes—fall within the guidelines that we've established, based on experience, testing and design.

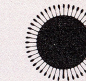

For example, we check every inch of our ribbons with an advanced ultraviolet light system that can detect even the slightest imperfections. We check our printwheels with high-powered optical cameras to make sure your print will not

be too light or too heavy. And we check our developer beads under particularly stressful conditions, to make sure they will not smudge or give you less than optimum quality output.

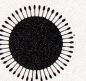

It's paying attention to the details that counts at IBM. Because we want our products to be the best they can possibly be.

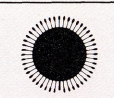

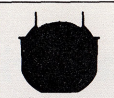

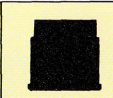

13.5 microns would have been small, but fine. 15 microns would have produced acceptably clear print. But over 20 days of testing, IBM toner particles consistently fell within an even narrower range.

To find out whether your Quietwriter machine uses (A), (J), (D) or (PC) Quiet Electronic Fonts, see page 4.
 Note: Because of inherent differences between printed typewritten impressions, these type samples should be used as a comparison guide only.

*Symbol 10 Actionwriter Printwheel may be used in 10 or 12 pitch.

- 1 Requires 96-character keyboard to print the double underscore.
- 2 Recommended for typing original copy with IBM Tech III or Carbon Film Ribbon only. Not recommended for use with Correctable Film Ribbon.
- 3 Requires IBM Chartpack Program.

Systems Printer Supplies

Get top performance from your IBM printer.
Choose tailor-made IBM Supplies.

Purchase an IBM printer supply, and you'll get a product that's specifically engineered for top performance and

results on your IBM printer. From ribbons to printheads, to printbands and toner, the IBM name is your assurance of quality.

4245	6204923+++	Black Nylon—OCR (3 MIL)	25	1,800,000PL

Are you printing ink smudges instead of letters? Before you call your service representative...

Check your ribbon shield. It's the clear Mylar piece that fits between your paper and ribbon. If it's worn or covered with ink, it's time to replace it.

For proper results, most ribbon shields should be replaced after every five ribbon changes.

Legend

C = Characters
PL = Print Lines

MICR = Magnetic Ink Character Recognition
OCR = Optical Character Recognition

Ribbon life experienced by user may vary significantly depending on the user's quality criteria and factors such as printer condition, machine settings and paper quality.

*Not stated because of variables that may affect life, i.e., printer application, paper and card stock.

**Red, blue, green—1,000,000 characters each color; black—1,800,000 characters.

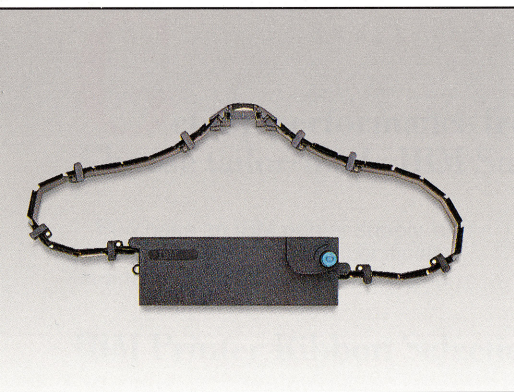

***Black—1,200,000 characters; red, blue—500,000 characters each; green—450,000 characters.

+ Requires ribbon shield #0174376.

+ + Models other than Model 1 require RPQ SO1075 or equivalent EC (both available free of charge).

+ + + Not for use on Model 1.

Systems Printer Supplies

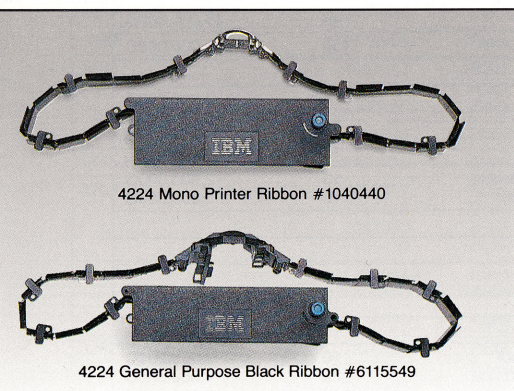

The 4224 Auto-Inking™ Ribbon gives you a powerful print.

Inside this cartridge is a special design that allows the ribbon to replenish itself from a highly concentrated source. The end result is great economy and longer ribbon life. For use on all 4224 Mono Printers.

Part Number	Average Yield*	Ribbon Length
1040580	15 million characters	25 yards

*Ribbon life experienced by user may vary significantly, depending on the user's quality criteria and factors such as printer condition, machine settings and paper quality.

4224 Mono Printer Ribbon #1040440

4224 General Purpose Black Ribbon #6115549

4224 Mono Printer Ribbon.

The IBM 4224 Printer is perfect for the 4224's performance level, giving you an average of 6 million characters in an easy-to-install "clean hands" cartridge. For use on all 4224 Mono Printers.

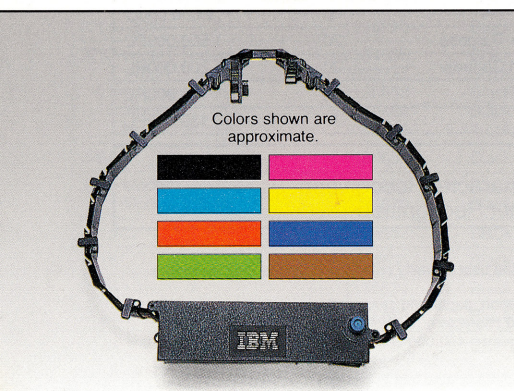

Part Number	Average Yield*	Ribbon Length
1040440	6 million characters	32 yards

* Ribbon life experienced by user may vary significantly, depending on the user's quality criteria and factors such as printer condition, machine settings and paper quality.

4224 Color Printers: General Purpose Black Ribbon.

A long life black nylon ribbon specifically designed for Models 1C2, 2C2 and 3C2. It offers economy as well as a "clean hands" cartridge design. So you touch only the cartridge, not the ribbon.

Part Number	Average Yield*	Ribbon Length
6115549	8 million characters	19.3 yards

Colors shown are approximate.

The 4224 8-Color Process Ribbon.

Use this brilliant color ribbon on all IBM 4224 Color Printers with enhanced graphics capability for colorful charts and graphics. Prethreaded into a "clean hands" cartridge, you never need to touch the ribbon. Prints black, magenta, cyan, yellow, red, blue, green and brown.

Part Number	Average Yield*	Ribbon Length
6115554	2.7 million characters	17.2 yards

* Ribbon life experienced by user may vary significantly, depending on the user's quality criteria and factors such as printer condition, machine settings and paper quality.

The 4224 4-Color Primary Ribbon.

For use on all IBM 4224 Color Printers. Prints black, blue, red and green. Its "clean hands" cartridge means you never get dirty. As with all IBM nylon ribbons, the ink is oil-based to help lubricate your IBM 4224 Printhead as it works.

Part Number	Average Yield*	Ribbon Length
6115555	2.7 million characters	17.2 yards

For printing visible as well as infrared scanned bar codes: the IBM 4234 Bar Code Ribbon.

The IBM 4234 Bar Code Ribbon is specifically designed for most bar code printing applications. A special black ink allows the printed bar code to be easily read by visible as well as infrared automatic identification system scanners.

For use on printer models 001 and 002.

Part Number	Average Yield*	Ribbon Length
1040505	2,000 Labels (Visible)** 1,200 Labels (Infrared)**	86 yards

* When using the .012 Dot Printband.

** AIAG (Automotive Industry Action Group) labels.

Note: This ribbon is not recommended for OCR printing applications.

The 4224 Printhead.

Models 101, 201 and 301: 9-wire dot-matrix printhead.

Part No.	Average Life*
6091490	400 million characters (DP mode)

Models 102, 202, 302, 1E2, 2E2 and all color models: 18-wire dot-matrix printhead.

Part No.	Average Life*
6091449	400 million characters (DP mode)

Models 1E3, 2E3 and 3E3: 18-wire dot-matrix printhead.

Part No.	Average Life*
11F3997	400 million characters (DP mode)

*Printhead life experienced by user may vary significantly, depending on the user's quality criteria and factors such as printer condition, machine setting and ribbon used. Printhead life figures which IBM has previously released reflect the minimum expected life which the vast majority of printheads will attain. Average expected printhead life is a much more useful figure for total-cost-of-printing analysis.

Both ribbons were made to match your 4234 printer perfectly. To give them a try, give us a call.

IBM 4234 Printer Ribbons: designed for top performance.

Two ribbons designed specially for use on your IBM 4234 Printers, Models 011, 012 and 013.

The general purpose ribbon gives you an average yield of 40 million characters so you get more quality output for your money. And each of the 40 million characters is sharp and clear—just the way you want your documents to look.

The bar code ribbon is designed for bar code printing applications. A special black ink allows the printed bar code to be read by infrared as well as visible light scanners.

Part Number	Average Yield*	Ribbon Length
NEW 1040282	40 million characters	120 yards
1040670	4,000 labels (visible) 2,400 labels (infrared)	120 yards

* Label yield is dependent upon label format, Bar Code symbology, and other parameters. Label yields with high-performance scanning equipment may exceed these values. AIAG stands for Automotive Industry Action Group.

Average ribbon yield and usage experienced by the user may vary significantly depending on the user's quality criteria and on factors such as printer condition, machine settings, paper quality and bar coding requirements.

4234 Printer Ribbon #1040282

The New IBM 4234 Auto-Inking™ Ribbon and 4234 General Purpose Black Ribbon give you even higher productivity—with their new protective shields.

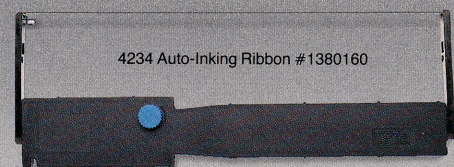

We've added a new feature to both of these ribbons—a protective strip to help shield the printband from dirt buildup, which means less downtime and increased productivity for you. For use on printer models 001 and 002.

Plus, IBM's Auto-Inking Ribbon is designed to raise your productivity to even higher levels, because its re-inking technology allows it to automatically replenish itself.

And the 4234 General Purpose Black Ribbon, with an average yield of 20 million characters, gives you economy, because of the high yield. Plus, you get convenience because there are fewer ribbon changes.

Part Number	Average Yield*	Ribbon Length
NEW 1380160	40 million characters	55 yards
6295158	20 million characters	86 yards

* Ribbon life experienced by user may vary significantly, depending on the user's quality criteria and factors such as printer condition, machine settings and paper quality.

4234 Auto-Inking Ribbon #1380160

4234 General Purpose Black Ribbon #6295158

IBM offers superior quality Dot Printbands for your 4234 Printers.

Our Dot Printbands are available in three dot sizes. Each one is designed to work its best for whichever text quality you choose.

We have three different printbands to choose from for your Models 1 and 2.

Plus three for our New Models 011, 012 and 013.

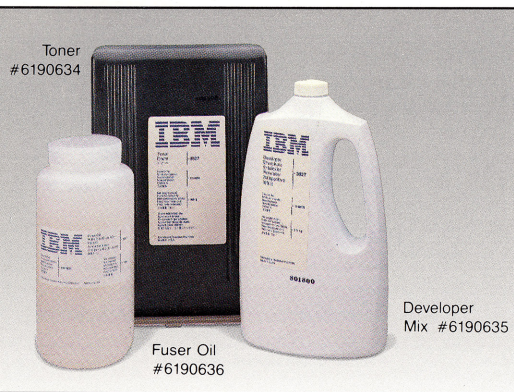

Either way, with reasonable care in handling, you get an expected life of over one billion characters for your printband.

Part Number	Description	Application
For Models 001 and 002*		
6275527	.012-inch Dot Printband	Near-letter quality
6275528	.016-inch Dot Printband	DP mode
6275529	.020-inch Dot Printband	Draft mode
For Models 011, 012 and 013*		
64X7523	.012-inch Dot Printband	Near-letter quality
64X7524	.016-inch Dot Printband	DP mode
64X7525	.020-inch Dot Printband	Draft mode

* Printbands designed for printer Models 011, 012 and 013 are not interchangeable with those designed for Models 001 and 002.

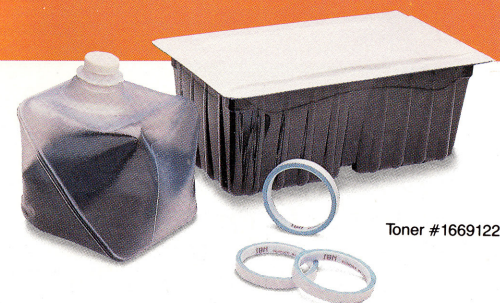

Systems Printer Supplies

Keep your 3827 Page Printer in top form with these high-performance supplies.

Your 3827 Page Printer was specifically designed to provide long term high performance. And the best way to keep it going strong is with genuine IBM Page Printer supplies. Designed to complement the 3827, these supplies get the most out of your Page Printer year after year after year.

Description	Part Number	Unit
Toner	6190634	1 cartridge
Developer Mix	6190635	1 bottle
Fuser Oil	6190636	1 bottle

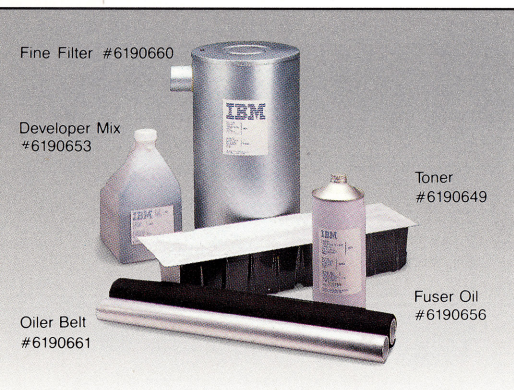

IBM 3800 Printer Supplies.

Your 3800 Models 1, 3, and 6 Printers give you maximum performance with quality IBM Supplies. IBM Toner and Developer have been specially formulated to ensure that you get sharp, clear images from your printer.

Description	Part Number	Unit
Developer Mix	1162223	2 bottles
Toner	1669122*	1 cartridge
Toner 5-Pack	1669334	5 cartridges
Splicing Tape	4165880	72 rolls

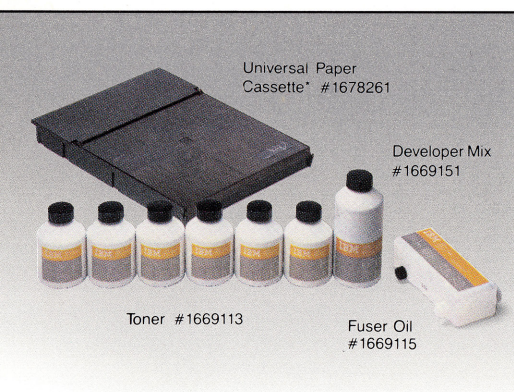

* Order in multiples of 30.

The 3835 Page Printer is only as good as the supplies you give it. So give it IBM Supplies.

When you're printing at high speeds day after day, you need supplies that are not only consistent, but consistently good. IBM Supplies for the 3835 are just that. Designed exclusively for this machine, these supplies will help keep your Page Printer running as if it were its first day on the job.

Description	Part Number	Unit
Toner	6190649	1 cartridge
Developer Mix	6190653	1 bottle
Fuser Oil	6190656	1 can
Oiler Belt	6190661	1 belt
Fine Filter	6190660	1 filter

Help your IBM 3820 Printer live up to its potential with these special supplies.

Keep your 3820 Printer performing its best with IBM Toner, Developer Mix and Fuser Oil.

The 3820 Toner is designed to yield the sharpest images from your machine's advanced laser-printing capabilities.

One bottle of 3820 Developer Mix can produce approximately 100,000 sharp

prints. And to keep your printer running smoothly, there's 3820 Fuser Oil.

For added convenience, the 3820 Universal Paper Cassette holds up to 250 sheets and adjusts to different sizes, so you can easily switch from one paper size to another.

Description	Part Number	Unit
Toner	1669113	6 bottles
Developer Mix	1669151	1 bottle
Fuser Oil	1669115	1 bottle
Paper Cassette*	1678261	1 cassette

* Min. paper size 7" x 10 1/2"; Max. paper size 10 1/4" x 14 1/4".

Don't run out of supplies tomorrow! Call us today.

At IBM, we even measured the diameter of this tiny developer bead (it's been enlarged 312 times) to minimize the chance of your machine clogging.

How we take care of the tiniest details — even on our biggest machines.

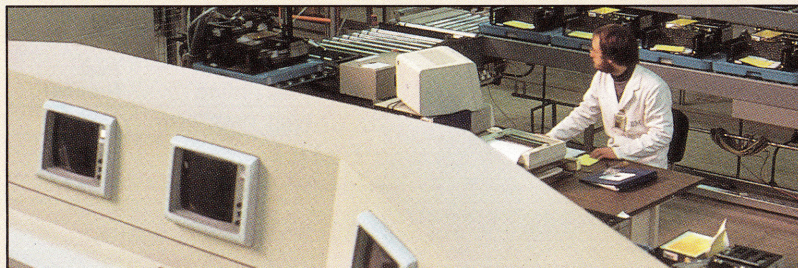

IBM designed the 3800 Printing Subsystem to print 20,000 lines a minute. Even minor flaws in its supplies could cause major problems in performance.

So while this printer was being tested in our development lab, so were its supplies. They were tested under all conditions, environments and demands, to make sure they perform exactly as designed.

Take toner, for example. One of the most important factors in toner performance is its particle size.

A consistent particle size is important because particles that are too small cannot transfer well to the paper. Particles that are too large can clog your machine, which could force you to shut it down for frequent cleaning.

By looking closely at every batch of toner—as well as every supply we make—we can confidently state that as long as you use IBM Supplies with your IBM equipment, you can expect the kind of performance we promised you the day you bought your equipment.

Every systems printer supply is hand-inspected by IBM's qualified operators to make sure that it works its best for you.

Toner #70X7001

Fuser Oil #70X7003

Paper Cassette #70X7004

On your mark...get set...print quality correspondence with IBM 3825 Page Printer Supplies.

Use your IBM 3825 Page Printer to set the pace for quality. Matched with our 3825 Page Printer Supplies, you'll get pages

and pages of sharp, professional-looking output minute by minute.

Systems Printer Supplies

Help your IBM 3812 Page Printer do its best work.

All IBM 3812 Page Printer Supplies work together to give you the benefits of an integrated system. And each component proves it. For example, the 3812 Toner Cartridge has a pull-tab for easy opening. Inside is the special thermo-

plastic powder which results in dark, easy-to-read images.

Plus, the 3812 Photoconductor Unit provides reliable, realistic imaging to reproduce your documents accurately. And 3812 Paper Cassettes adjust to hold many different paper sizes so you can quickly switch from one type of paper to another.

IBM 6670 Toner: For quality that's worth repeating, repeating, repeating.

You depend on clear, quality output to make you look good. So get the supplies that make you look even better.

The 6670 High Yield Toner comes in easy-to-load cartridges for quick changes. And it offers consistent quality for all the work you print.

Description	Part Number	Unit
High Yield Toner	1669081	1 cartridge

Supplies for the IBM 5204 Quickwriter™ Printer

Make your important correspondence look its best with the IBM 5204 Film Ribbon.

The new IBM 5204 Film Ribbon has the quality and consistency you need for your Quickwriter Printer. It gives you excellent contrast and dark characters for all your letters and reports. And its "drop-in" design lets you quickly change from film to fabric for economically printing rough drafts and data.

Note: this ribbon is recommended for letter-quality printing. For draft-quality printing applications, see the IBM 5204 Fabric Ribbon below.

Color	Part Number	Average Yield*
Black	1319300	250,000 characters**

*Ribbon yield will vary by application, pitch, printer modes and other variables.

**Letter-Quality Mode.

Style and substance: 5204 Electronic Fonts for the Quickwriter Printer.

The IBM 5204 Electronic Font Cartridges allow you to say it with style in a practical variety of type styles.

So use the type style that comes with your printer for all your general correspondence needs. Then add the Italic Font for passages that need special emphasis. And for the ultimate letter-perfect printing, select one of the Selectric Quality Fonts.

**Additional cartridges are available.
Call us for more information.**

Now you can get high yield and super economy with the IBM 5204 Fabric Ribbon.

The IBM Quickwriter achieves print speeds of up to 330 characters per second. So it needs a ribbon that can handle a lot of stress...and last a long time. That's why we offer the IBM 5204 Fabric Ribbon. With a rugged fabric design and an average yield between 1.5 and 3.0 million characters, it'll keep your printer up and running in top form.

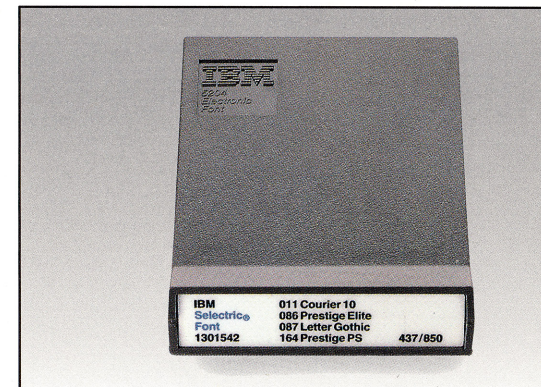

Color	Part Number	Average Yield*
Black	1319308	1,500,000— 3,000,000 characters**

*Ribbon yield will vary by application, pitch, printer modes and other variables.

**Draft mode.

The Quiet Non-Correcting Ribbon.

The Quiet Non-Correcting Ribbon is a high-yield performer designed for use with the IBM Quietwriter 5201 Printer and 5201 Printer Model 2. It provides clear, crisp impressions—ideal for bank checks and similar documents—because it provides an unalterable print image. Plus, it comes in an easy-to-change cassette to keep your hands clean.

Color	Part Number	Average Yield
Black	1299790	160,000 characters

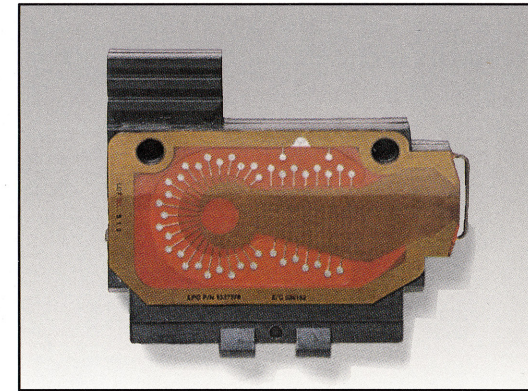

The Quiet Printhead.

The Quiet Printhead has forty electrodes that quietly signal the ribbon in the shape of your chosen character. Through a heat transfer process, the image is then transferred from ribbon to paper. It's quiet, quick and clean.

Use the Quiet Printhead for the IBM Quietwriter 5201 Printer, 5201 Printer Model 2, Quietwriter Printer T Model 2 and Quietwriter Typewriters.

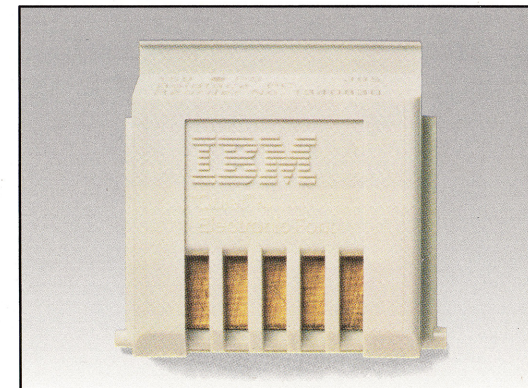

Description	Part Number	Average Yield*
Printhead	1337488	4 million characters

*Actual printhead life varies depending on the user's quality expectations and other variables.

Personal Computing Printer Supplies

IBM's 4207 Proprinter™ Ribbon gives you dark, rich type for letter-quality printing.

The IBM 4207 Proprinters—including the new Proprinter X24E—were designed with 24-wire printheads to provide denser type for letter-quality printing and enhanced graphics.

To match the capabilities of the 24-wire

printhead, we've developed the 4207 Proprinter Ribbon. It has fabric dense enough to be punctureproof, yet capable of making the clean impressions your letter-quality printing requires.

Color	Part Number	Ribbon Length	Average Yield
Black	1040475	20 yards	3 million characters (Draft mode)

The 4208 Proprinter XL24 and Proprinter XL24E Ribbon...for enhanced graphics.

The 4208 Proprinter Ribbon produces letter-quality printing and high-resolution

graphics. So your reports and slides come across strikingly clear.

Color	Part Number	Ribbon Length	Average Yield
Black	1040414	27 yards	4 million characters (Draft mode)

4201 Proprinter, 4201 Proprinter II and 4201 Proprinter III Ribbon.

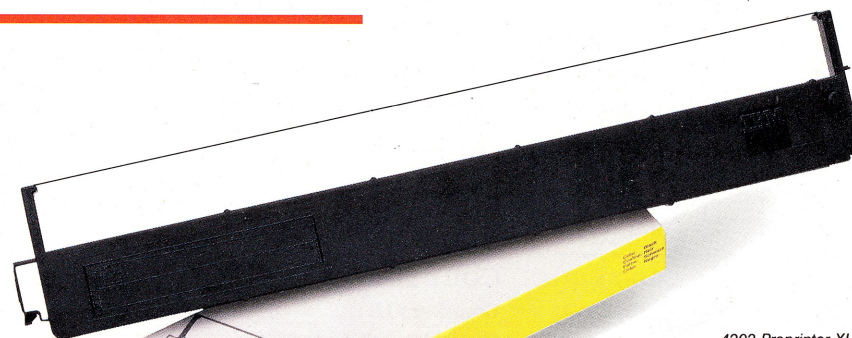

For a tough, long-lasting ribbon that offers snap-in convenience, this is the one to buy. It's an excellent buy, too.

Color	Part Number	Ribbon Length	Average Yield
Black	6328829	20 yards	3 million characters (Draft mode)

The 4202 Proprinter XL, Proprinter II XL, Proprinter III XL and 4210 Printer Ribbon.

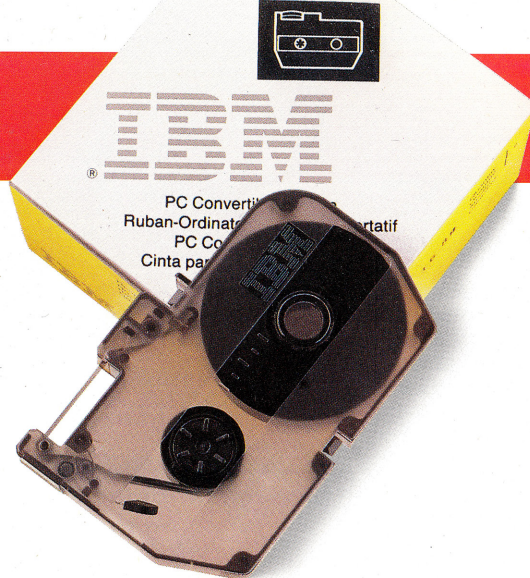

Here's a hardworking, long-lasting ribbon designed for the IBM Proprinters and IBM 4210 Printer. The black nylon ribbon is guaranteed to provide excellent print quality time after time.

Color	Part Number	Ribbon Length	Average Yield
Black	1040150	27 yards	4 million characters (Draft mode)

Personal Computing Printer Supplies

PC Convertible
Ribbon Minicassette
#2682958

Our PC Convertible Supplies help deliver sharp, clean text.

The ink on this ribbon is transferred to the page by heat, not impact...delivering clean, sharp printouts time after time. With a ribbon length of 340 feet, it's capable of yielding up to 28,000 of these quality characters. Plus, a special end-of-ribbon tab signals the system when the ribbon needs replacement. Thermal paper is available in roll or cut sheet.

Description	Part Number	Contents
Ribbon Minicassette	2682958	340 feet
Thermal Roll Paper*	1503923	2 rolls/carton (8½" x 82')
Thermal Cut Sheet Paper*	1503924	250 sheets/pkg. (8½" x 11")

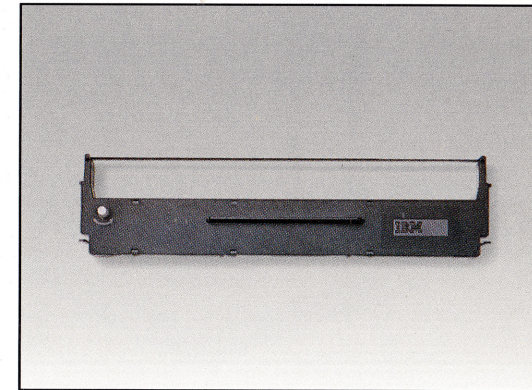

*Also for use on PCjr 5181 Compact Printer.

Call us today for assistance and ordering.

The 5152 Ribbon.

Expect great results and get them. This black nylon ribbon is designed to give you crisp, clean impressions from your IBM 5152 Printer or Epson MX-70/80 Printer.

Color	Part Number	Ribbon Length
Black	7034623	20 yards

IBM Wheelprinter 5216 Supplies

The 9756 Ribbon: high quality for your most important correspondence.

This ribbon delivers crisp, letter-quality printing to give your executive letters, proposals and finished reports top quality.

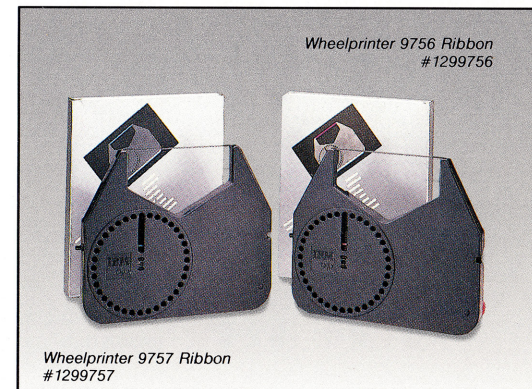

Color	Part Number	Average Yield*
Black	1299756	138,000 characters

*10 pitch

The 9757 Multistrike Ribbon for high yields (and confidential material).

The 9757 Ribbon tells no tales because multiple strikes over each part of the ribbon make it impossible to decipher individual letters. Its high yield makes it economical too.

Color	Part Number	Average Yield
Black	1299757	500,000 characters

IBM Wheelprinter E Model 5223 Ribbons

Easystrike Multipurpose Ribbon.

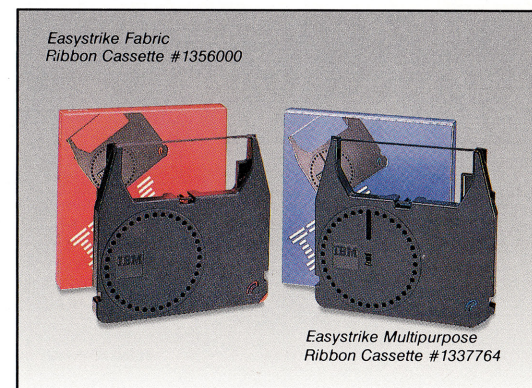

Designed for high yield, the Easystrike Multipurpose Ribbon Cassette is ideal for bank checks and similar documents, as well as hard-to-image surfaces. Its print quality makes all your work look first rate.

Color	Part Number	Average Yield
Black	1337764	440,000 characters

Easystrike Fabric Ribbon Cassette.

Great for high-volume printing. Truly economical too, with an average yield of 1.5 million characters. The IBM Easystrike Fabric Ribbon is the smart choice for drafts and classroom use.

Color	Part Number	Average Yield
Black	1356000	1.5 million characters

Personal Computing Printer Supplies

The results are in, and they're colorful with IBM 5182 Color Printer Ribbons.

With IBM Personal Computer Color Printer Ribbons, you have a choice of ways to make your work more colorful. The 4-color Primary Ribbon prints red,

blue, green and black. And the 8-color Process Ribbon produces yellow, cyan, magenta, black, orange, green, violet and brown.

Description	Part Number	Ribbon Length	Average Yield
Black	6320194	36 yds.	8,000,000 characters
Primary	1501573	36 yds.	3,600,000 characters
Process Color	1501574	36 yds.	1,800,000 characters

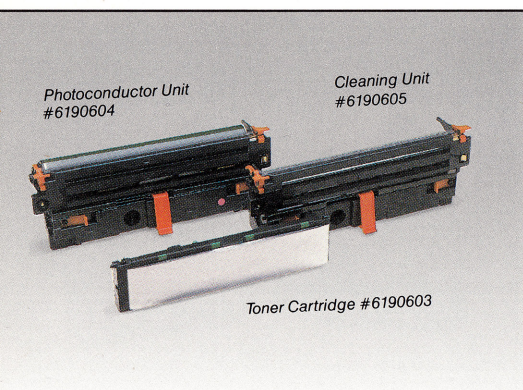

IBM Multi-System Paper is tested both at the mill and in IBM's own laboratory to make sure it meets a set of rigorous standards.

Paper is paper is paper. Unless it's IBM Multi-System Paper.

Paper, even in normal office situations, is subject to stresses that can cause it to warp (causing less-than-perfect documents), or ultimately jam your equipment.

IBM Multi-System Paper is manufactured to a set of rigid specifications that reduce curl and minimize moisture content. Then it's tested both at the paper mill and in IBM's own laboratory to make sure it meets those specifications. So what you get is a paper that performs much like our equipment—consistently well, page after page. For typing, copying and printing.

Size	Part Number	Sheets per carton
8½"×11"	7034548	8 reams of 500
8½"×14"	7034550	8 reams of 500

Overhead Transparency Film #5470296

Diskettes

This newly designed display case conveniently opens up to put your 3.5-inch diskettes at your fingertips—and closes to protect them.

Don't run out of supplies tomorrow! Call us today.

It's clear to see why our new display case protects your diskettes—and we're offering it to you at no extra cost.

IBM's newly designed plastic diskette container gives you even more convenience than before—and you don't pay a penny more. Made to replace the traditional paper box, it serves many new purposes. For example:

- The see-through, smoke-tint plastic protects your diskettes from external contaminants and allows you to see what diskettes are in the case without opening it.
- Its uniquely hinged case also forms a useful stand-up display, so you can find the diskette you need more quickly.
- And now each of the ten diskettes comes individually wrapped in a plastic sleeve for extra protection and increased reliability.

IBM 3.5-inch 2.0MB Diskettes.

IBM's unique 3.5-inch 2.0MB Diskette has a formatted storage capacity of 1.44MB. It's designed for use in the IBM Personal System/2 Models 50, 60, 70 and 80, to let you get the most in storage and performance from their advanced capabilities.

3.5-inch Diskettes	Formatted Capacity	Quantity per Package	Part Number
2.0MB Diskette	1.44MB	10/Slipcase	6404079

IBM 3.5-inch 1.0MB Diskettes.

The IBM 3.5-inch 1.0MB Diskette is used with the IBM Personal System/2 Model 25, Model 30 and the IBM PC Convertible. You can also use this diskette with non-IBM systems and 3.5-inch diskette drives. It's compatible with Apple Macintosh, Macintosh Plus, Lisa 3.5, Commodore A 1000 and A 1010, Data

General DG-1, Hewlett-Packard 150 and 9121, and the Sony SMC 70 and 335. The following 3.5-inch diskette drives can also use IBM 3.5-inch 1.0MB Diskettes: Alps Electric, BASF, Canon, Epson, NEC, Olivetti, Tandon, TEAC, Toshiba and YE Data.

3.5-inch Diskettes	Formatted Capacity	Quantity per Package	Part Number
1.0MB Diskette	720KB	10/Slipcase	6404108

Important: A physical specification difference exists between the two diskette types. The 3.5-inch 1.0MB Diskette should always be formatted to 720KB capacity. The 3.5-inch 2.0MB Diskette should always be formatted to 1.44MB. Substitution of a 1.0MB Diskette for a 2.0MB Diskette, or vice versa, will result in unreadable recording and possible loss of data.

H

ow IBM's stress-tested diskettes can reduce your stress.

Diskettes aren't ordinarily placed under tremendous stress in normal business use. But IBM tests them that way to make sure they work under any condition.

In fact, our diskettes are engineered to exceed normal disk drive requirements. So you get increased storage capacity and enhanced reliability.

That's why IBM carefully conducts the following electrical stress tests:

- We check the "signal amplitude" to make sure that what's recorded on the diskette reads back loud and clear.
- We measure its ability to be rewritten or rerecorded over a lifetime of usage.
- Plus, we test our diskettes to make sure they retain 100% of all recorded information.

With these and other tests, we are so confident that you can rely on our diskettes, that we fully guarantee them for five years...or your money back.

IBM 5.25-inch Diskettes.

IBM 5.25-inch Diskettes, for the IBM PC XT, IBM Personal Computer AT and a host of other machines, offer you

100% first-pass reliability for accurate data storage and retrieval. Their durability, quality and affordable price have made them one of IBM's most popular storage media.

Legend:

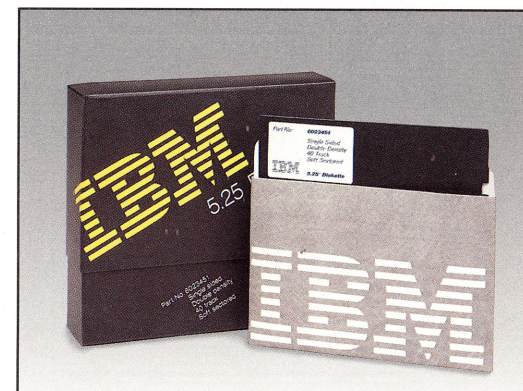

LC = Library Case
SC = Cardboard Slipcase

The small disk for big storage — the IBM Optical Disk Cartridge.

Get as much data storage on one small, 5.25-inch removable disk as on 555 standard 5.25-inch 360KB diskettes —with the IBM Optical Disk Cartridge.

The Optical Disk Cartridge works with the IBM PC, PC XT, Portable PC,

Personal Computer AT, PC 3270, AT 3270 and all models of the IBM Personal System/2 (when combined with the IBM 3363 Optical Disk Drive).

Here are some of the advantages of an IBM Optical Disk Cartridge:

- Your files can be updated by adding information or writing changes in the unused space on the media.
- You can permanently record up to 200MB of data for future read operations on one small, 5.25-inch disk.
- Data can be copied from a single cartridge onto many, for distribution to all who need it.
- The cartridge is removable for security, easy transport and convenient storage.
- A hard plastic cartridge helps protect your data against damage.
- And it's covered from the date of purchase by IBM's five-year warranty.

Optical Disk Cartridge #63X4199

Part Number	Formatted Capacity
63X4199	200MB

At IBM, 99.9% perfect is not enough. That's why every IBM Diskette is manufactured and thoroughly tested to work perfectly for you.

Diskettes

Depend on IBM 8-inch Diskettes for quality.

IBM 8-inch Diskettes are carefully tested to make sure you get both the performance and dependability you

need. As with all IBM diskettes, our 8-inch version guarantees you 100% first-pass reliability.

Diskette Magazine.

The IBM Diskette Magazine fits System/34, System/36, System/38 and Series/1 magazine-loading drive units.

It conveniently holds 5 diskettes and loads directly into your diskette drive. Plus, it comes with a retainer, color-coded labels and end-caps to protect diskettes when magazine is not in use.

Part Number	Quantity
2462521	5/pkg.

Diskette ID Labels.

8-inch diskette package contains 30 labels: six each in red, yellow, blue, green and gray. Minimum order: five packages.

Part Number	Quantity
2305833	30 labels/pkg.

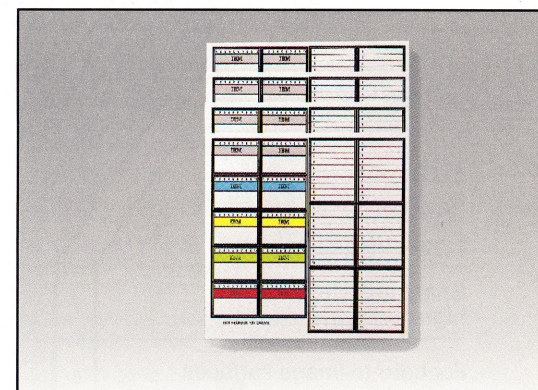

Diskette Magazine ID Labels.

Now it's easier than ever for you to identify your diskettes and record their contents. By using our color-coded labels as part of your filing system, you can organize your word processing, accounting or personal files.

Each sheet contains 16 color-coded labels: two each in red, yellow, green, blue and gray—plus six index labels.

Minimum order: two packages.

Part Number	Quantity
2462512	3 sheets/pkg.

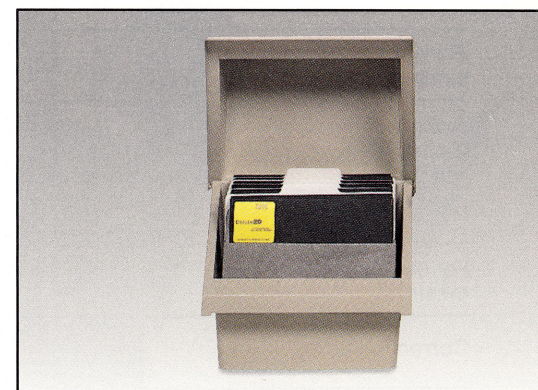

Fit fifty disks in one file with Fiftifile.

Protect and file up to fifty 8-inch diskettes with this ruggedly constructed polymer case. With a hinged cover for desktop storage, your Fiftifile comes with five heavy-duty dividers and 30 color-coded diskette ID labels.

Additional Fiftifile tab dividers are available in packages of five. Minimum order: three packages.

Description	Part Number	Quantity
Fiftifile	7034602	1
Extra Dividers	1669537	5/package

Typewriter and Word Processing Supplies

If IBM made the typewriter, you can still get the ribbon.

IBM has been making typewriters for over 50 years—and still offers ribbons for nearly every IBM Typewriter model ever made. So even if you've got an IBM

Model B made in the 1950s, you can find a high-quality ribbon specially designed to get the best from it.

Each IBM Ribbon is designed to deliver high-quality and long life. In fact, an IBM EasyStrike® Ribbon must pass over 125 quality tests. From the ink density to the durability of the film or nylon, each test is designed to ensure that you get the ultimate in performance from each and every IBM Ribbon you use.

Whether you want to maintain security

with a ribbon that can't be read after use, need a cost-efficient ribbon for rough drafts, or require special colors or extra sharp impressions, there is an IBM Ribbon made especially for the job.

If you don't see the ribbon you need in the chart, please give us a call. We can help you.

How to find your ribbon.

The IBM Ribbon selection chart below makes finding the right ribbon

for your IBM machine as easy as one, two, three.

- 1) Find your IBM machine on the top of the chart.
- 2) Match it with the job you need to do from the list on the side of the chart.
- 3) That will give you a ribbon number from **1** to **29** that lets you locate the ribbon you need in this section.

Typewriter and Word Processing Supplies

Your most notable work deserves the IBM Easystrike Superior Write Correctable Ribbon Cassette.

1 When appearances count, count on the IBM Easystrike® Superior Write Correctable Ribbon.

It prints on a wide variety of surfaces: from highly textured letterhead stationery to most labels, even multipart forms. It gives you a rich, bold type that gives your important correspondence—letters, proposals, reports—the premium look they deserve. And it uses the Easystrike Lift-off Tape Cassette 6A.

Color	Part Number	Average Yield*
Black	1380999	115,000 characters

*Actual yield will vary depending on type style used.

**Try these ribbons today!
Call us now to order.**

Get 40% greater ribbon yield—and fewer ribbon changes—with the IBM Easystrike High Yield Correctable Ribbon Cassette.

2 You expect your equipment to keep up with the large volume of paperwork you produce each day. With the IBM Easystrike® High Yield Correctable Ribbon, you can now expect the same from your ribbon.

Thanks to advances in IBM ribbon technology, this black High Yield Correctable Ribbon now *lasts 40% longer* than before—and delivers a print quality that's first rate. Uses the Easystrike Lift-off Tape Cassette 6A.

Color	Part Number	Average Yield*
Black	1299845	210,000 characters

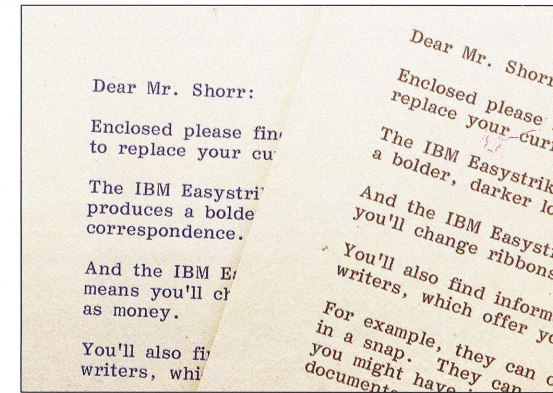

*Actual yield will vary depending on type style used.

Add elegance and color to your work with Easystrike Correctable Ribbon Cassettes.

3 Make that chart easier to follow—those section headings stand out from the crowd. All it takes is a blue Easystrike® Correctable Ribbon Cassette.

And if you're printing on buff or ivory colored paper stock, our *brown* Easystrike Correctable Ribbon adds the perfect touch of elegance. Ideal for invitations and formal correspondence!

Either ribbon snaps in and out in seconds, making it easy to continue typing in black. And corrections are a breeze with the Easystrike Lift-off Tape Cassette 6A.

For buff or ivory-colored stationery—use a brown Easystrike Correctable Ribbon Cassette. Or use blue for a special, distinctive look.

Color	Part Number	Average Yield*
Brown	1337762	150,000 characters
Blue	1337763	150,000 characters

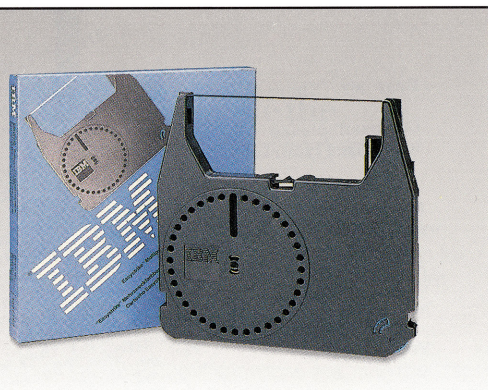

*Actual yield will vary depending on type style used.

Show off the quality of your ribbons with some distinctive type styles. See pages 5,6,7.

IBM Easystrike High Yield Correctable Ribbon #1299845 and Easystrike Lift-off Tape Cassette #1337765.

Typewriter and Word Processing Supplies

4 Improve your image with the Easystrike Multipurpose Ribbon.

The Easystrike Multipurpose Ribbon is ideal for bank checks and similar documents, as well as other hard-to-image surfaces. Designed for high yield, its print quality makes all your work look first rate.

To get those high-quality typos off the page, order Easystrike Cover-up Tape Cassettes (see below).

Color	Part Number	Average Yield
Black	1337764	440,000 characters

5 For rough drafts and classroom use: the IBM Easystrike Fabric Ribbon Cassette.

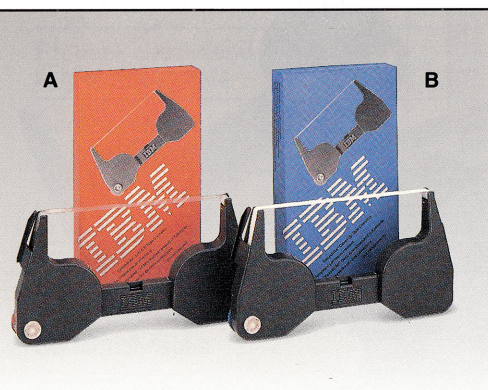

This economical ribbon boasts an average yield of 1.5 million characters, making the IBM Easystrike Fabric Ribbon the smart choice for your rough drafts and classroom use. (Note: Lift-off Tape and Cover-up Tape Cassettes cannot be used with this ribbon.)

Color	Part Number	Average Yield
Black	1356000	1.5 million characters

6 Correct mistakes as fast as you make them with IBM Easystrike Lift-off and Cover-up Tape Cassettes.

IBM Correction Tape Cassettes eliminate your typos fast, cleanly and easily.

Installing them is fast, clean and easy too. All you do is snap them onto your Easystrike Ribbon Cassette and you're ready to go.

H

ow IBM Ribbons make your typewriter more reliable than ever.

If you've been using IBM Typewriters for any length of time, you may have noticed that IBM Ribbons have grown larger, with more internal components. Here's why:

Typewriters of the past were designed with some small parts that wore out over time—ribbon guides and tension springs. But IBM designed its newer ribbons to hold more of those components. So now, when you replace it, you're replacing some parts that used to wear out.

IBM also improved quality control technology to make sure your ribbon performs its best.

IBM checks every inch of the finished ribbon with an ultraviolet light system for microscopic gaps and holes. So even the slightest imperfections can be detected.

In fact, IBM checks your typewriter ribbon more than 125 times before it leaves their plant. So your work will look great the first time you print it.

Description	Part Number	Average Yield
(A) Lift-off Tape	1337765	6,000 corrections
(B) Cover-up Tape	1337766	5,000 corrections

Typewriter and Word Processing Supplies

Don't run out of supplies tomorrow! Call us today.

7 The 190 Correctable Ribbon Cassette.

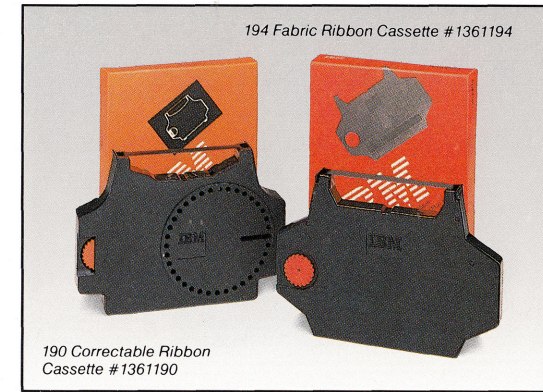

The 190 Correctable Ribbon Cassette is designed for high-quality performance on ordinary documents and correspondence. The 195 Lift-off Tape lifts errors off completely for clean, undetectable corrections. Note: Not recommended for bank checks and similar documents.

Description	Part Number	Average Yield
Black ribbon	1361190	66,000 characters
Lift-off Tape	1361195	1,200 corrections

8 The 194 Fabric Ribbon Cassette.

A long-lasting fabric ribbon you can use and use and use—for true economy. Produces over a half-million permanent impressions. Recommended for bank checks and similar documents, and for offset masters.

Color	Part Number	Average Yield
Black	1361194	600,000 characters

Quiet Correcting Ribbon.

9 The Quiet Correcting Ribbon has built-in correction capability for general purpose typing. And a "clean hands" design ensures that your hands will never get dirty.

Color	Part Number	Average Yield
Black*	1299602	160,000 characters

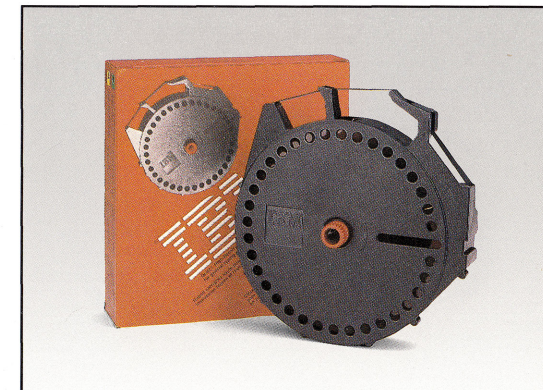

*Because this ribbon is correctable, it is not recommended for use on bank checks and similar documents.

10 Quiet High Density Correcting Ribbon.

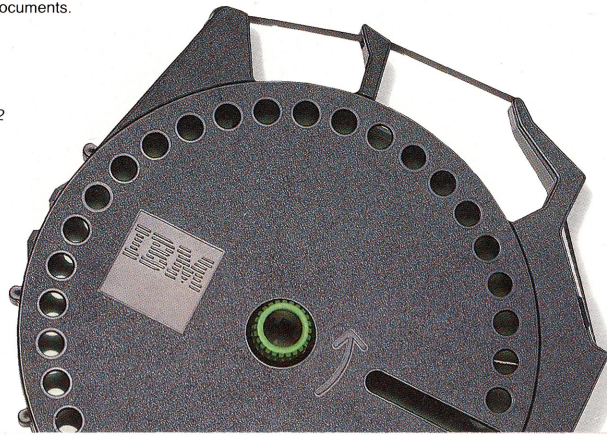

The Quiet High Density Correcting Ribbon is designed for general typing, and for darker print on textured paper. This ribbon also has the "clean hands" cartridge, so you never need to touch the ribbon.

Color	Part Number	Average Yield
Black*	1299635	160,000 characters

*Because this ribbon is correctable, it is not recommended for use on bank checks and similar documents.

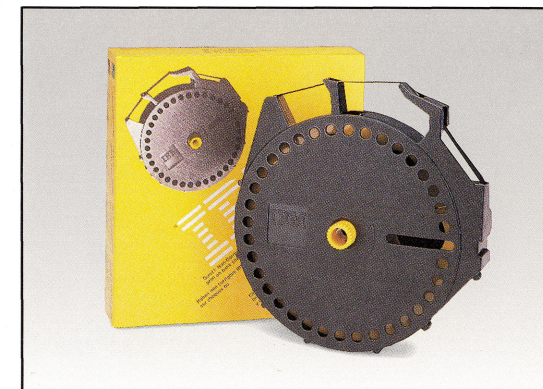

Quiet Correcting Ribbon #1299602

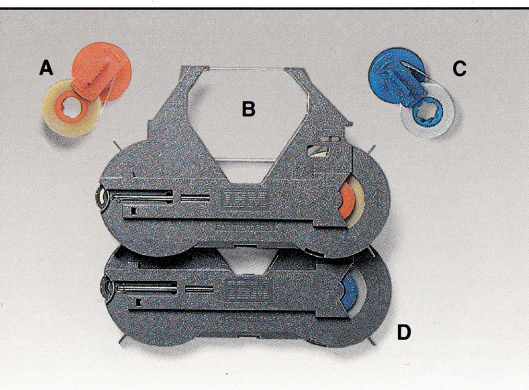

11 Quiet Non-Correcting Ribbon.

The Quiet Non-Correcting Ribbon provides a permanent, non-alterable print image for checks, money orders and similar documents. Plus it comes in an easy-to-change cassette to keep your hands clean.

Color	Part Number	Average Yield
Black	1299790	160,000 characters

Typewriter and Word Processing Supplies

12 IBM has the right correcting tape to go with the right ribbon.

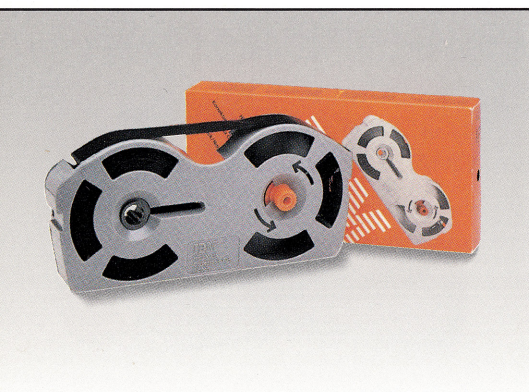

When each kind of IBM Correctable Typewriter Ribbon was designed, a correcting tape spool or cassette was engineered right along with it. To find the proper correction tape for your IBM ribbon, just match the color of the cassette or spool to the color of the advance knob on the ribbon you are using.

Description	Part Number	Average Yield
(A) Lift-off Tape Spool (Orange)	1136433	2,000 corrections
(B) Lift-off Tape Cassette (Orange)	1299315	6,800 corrections
(C) Cover-up Tape Spool (Blue)	1136435	2,000 corrections
(D) Cover-up Tape Cassette (Blue)	1299325	8,000 corrections

Nobody's perfect. But with IBM's Correction Tapes, you'll come close. Order today to make sure you have plenty on hand.

Mistakes go unnoticed with IBM Correction Tape.

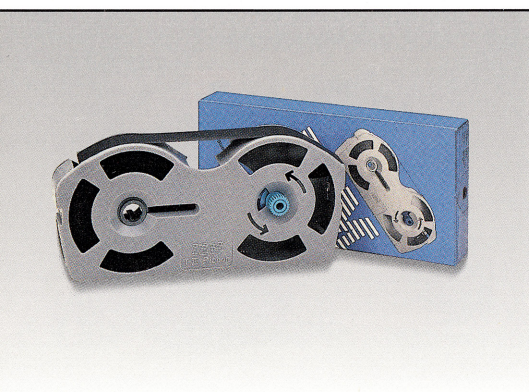

More than ten years ago, an IBM engineer discovered that when an adhesive was applied to special ink, the printed characters could be lifted from the paper without a trace. This innovative idea led to the creation of the lift-off tape — and marked the beginning of the “self-correcting” revolution in typing efficiency.

13 The High Yield Correctable Film Ribbon.

The professional's favorite and IBM's most popular typewriter ribbon. The High Yield Correctable Film Ribbon helps get the job done right every time. Recommended for general correspondence. Use it with the IBM Lift-off Tape 12A shown above.

Color	Part Number	Average Yield
Black	1299095	150,000 characters
Brown	1299363	150,000 characters
Blue	1299361	150,000 characters

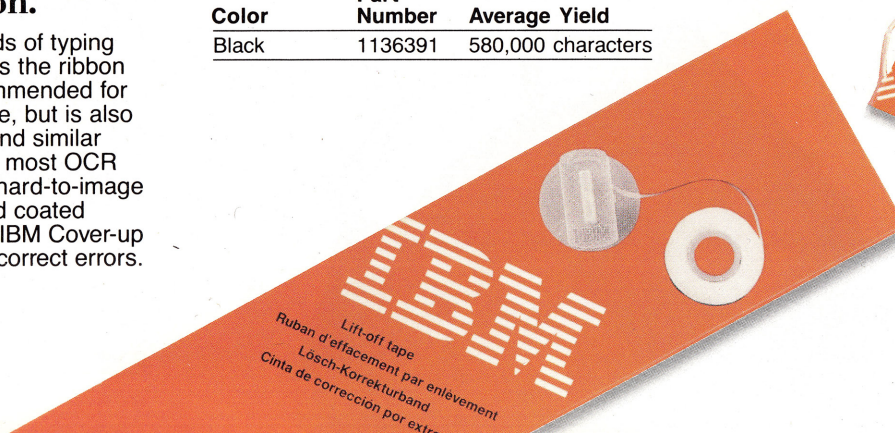

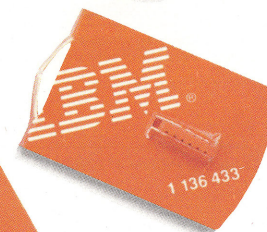

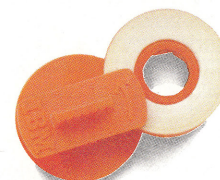

14 The TIII Ribbon.

When many different kinds of typing jobs need to be done, this is the ribbon to choose. The TIII is recommended for high-quality correspondence, but is also excellent for bank checks and similar documents, offset masters, most OCR applications and typing on hard-to-image surfaces such as labels and coated paper. Use this ribbon with IBM Cover-up Tape 12C, shown above, to correct errors.

Color	Part Number	Average Yield
Black	1136391	580,000 characters

463 Cartridge Ribbon #1299463

The 463 Cartridge Ribbon.

15 For IBM Displaywriter and 5520 Printwheel Printers 5210, 5217, 5218, 5219, 5228 and 5229. An ideal multistrike ribbon for general purpose typing, offset masters, manifold, bank checks and similar documents, as well as hard-to-image surfaces. Economical, too, because of its high yield.

Color	Part Number	Average Yield
Black	1299463	1,000,000 characters

17 The 210 Correctable Ribbon Cassette.

Choose the ribbon that best meets your needs: black, for general purpose typing; brown, for typing on buff or ivory-colored paper; or blue, for highlighting text.

With a high average yield of 208,000 characters (black), the 210 Correctable Ribbon is recommended for typing original documents and correspondence on smooth uncoated paper. Use with Lift-off Tape 12A.

16 The 800 TIII Ribbon Cassette.

With 38% more impressions than the original IBM 800 TIII, you get more economy—with fewer ribbon changes. Recommended for high-quality correspondence, bank checks and similar documents, offset masters, most OCR applications and typing on hard-to-image surfaces such as labels and coated paper. Uses Cover-up Tape 12C.

Color	Part Number	Average Yield
Black	1299509	800,000 characters

Color	Part Number	Average Yield
Black	1299508	208,000 characters
Brown	1299510	150,000 characters
Blue	1299512	150,000 characters

18 The Correctable Ribbon Cassette in black, brown or blue.

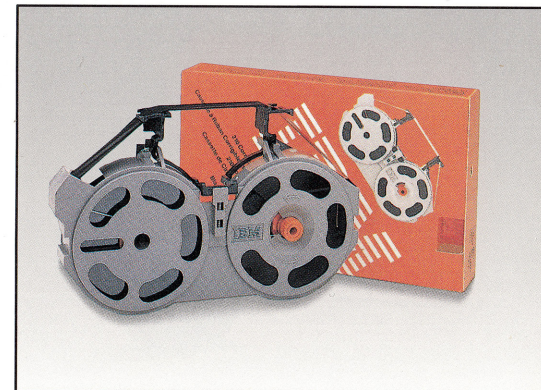

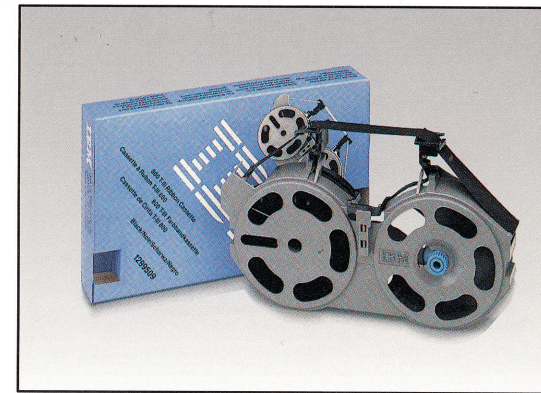

Recommended for typing documents and correspondence on smooth, uncoated paper. The ribbon snaps right onto a 12B Lift-off Tape Cassette for extra convenience.

Color	Part Number	Average Yield
Black	1299300	210,000 characters
Brown	1299303	150,000 characters
Blue	1299301	150,000 characters

19 The TIII Ribbon Cassette.

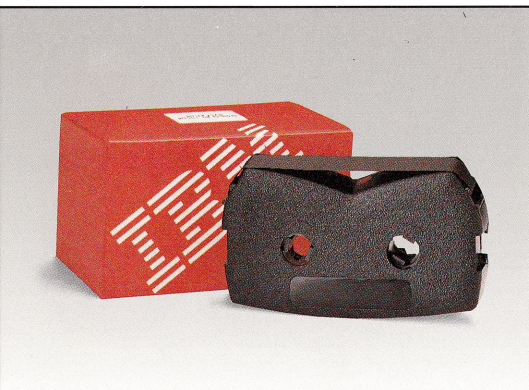

The extra ribbon length in this cassette gives you over one-third more impressions than the original IBM TIII Ribbon. Recommended for high-quality correspondence, bank checks and similar documents, OCR applications and typing on hard-to-image surfaces such as labels and coated paper. Use with Cover-up Tape Cassette 12D.

Color	Part Number	Average Yield
Black	1299320	800,000 characters

For a darker image than is possible from the IBM Composer Cartridge Ribbon. Recommended for OCR applications, polyester film and hard-to-image surfaces. It's perfect for your Electronic Selectric Composer, Magnetic Card Composer, Magnetic Card Typewriter and Magnetic Keyboard Typewriter.

Color	Part Number	Average Yield
Black	1136479	100,000 characters

Typewriter and Word Processing Supplies

I

f you're still using your IBM Typewriter from yesterday, we still offer supplies for it today.

Take the IBM Model B Typewriter, for example. Introduced in 1956, it has been replaced by dozens of new IBM Typewriter models since then. Yet we still offer ribbons to fit that typewriter today.

IBM offers a full range of typewriter, word processing and computer systems, including the Personal System/2 and the new Wheelwriter Series II Typewriters. And if the performance of the IBM Model B Typewriter is any indication, we'll be supporting these systems for decades to come as well.

The 1956 Model B. We're still offering supplies for this durable typewriter today.

27 The 5121 Standard Film Ribbon.

The 5121 Standard Film Ribbon is a versatile ribbon you can use for almost any typing job. Made for IBM Typebar Typewriters (Models A, B, C and D) without Film Ribbon Cartridge Mechanisms, it's perfect for general purpose typing and offset masters.

Color	Part Number	Average Yield*
Black	1010760	84,000-100,000 characters

*May vary, depending on typewriter.

28 The 5121 Film Ribbon Cartridge.

A consistent performer for most typing jobs. This ribbon is designed for general purpose typing and offset masters. Made for Typebar Typewriters, Models A, B, C and D.

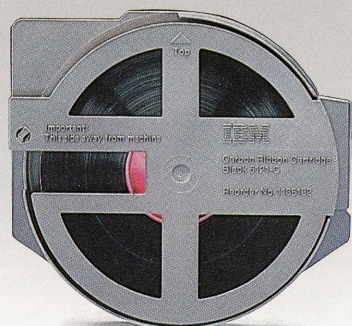

Color	Part Number	Average Yield*
Black	1136182	84,000-100,000 characters

*May vary, depending on typewriter.

29 The Superior Write Nylon Ribbon.

The Superior Write Nylon Ribbon is a general purpose ribbon for IBM Models A, B, C and D Typebar Typewriters. IBM Models A and B Typebar Typewriters with Fabric Ribbon Mechanisms use the MS (metal spool) Ribbon. IBM Models C and D Typebar Typewriters with Fabric Ribbon Mechanisms use the CC (clean clip) ribbon.

About your Authorized Dealer...

For quality IBM Supplies backed by unsurpassed service, we're always on call.

Being an IBM Authorized Supplies Dealer is special, because that title is not available to just anyone. It's an accomplishment that must be earned and maintained. Like IBM, we're committed to anticipating your needs with quality products and reliable service. Service every bit as consistent as IBM Supplies are.

Every day, we build upon our record for satisfying customers—you—with on-time order fulfillment. We do this by stocking the most current and complete line of IBM products.

As Dealers, we're frequently invited to talk directly with IBM engineers. We do.

So we and our experienced sales staff can advise you properly and help you make the best choice of supplies for your equipment.

The quality and the consistency of these supplies mean you can rely on them for high yield. This gives you the excellent value you can always expect when you do business with an IBM Authorized Supplies Dealer.

Just give us a call to enjoy all these benefits, and ask about the discounts you can get with us.

Call us today to place your order.

We'd like to present our case
for IBM 3.5-inch diskettes.

NEW

**Our new display case is designed to protect your diskettes
and provide you with convenient storage — at no extra cost.**

IBM's newly designed plastic diskette
container protects your IBM 1MB and
2MB 3.5-inch diskettes—plus it keeps
them handy.

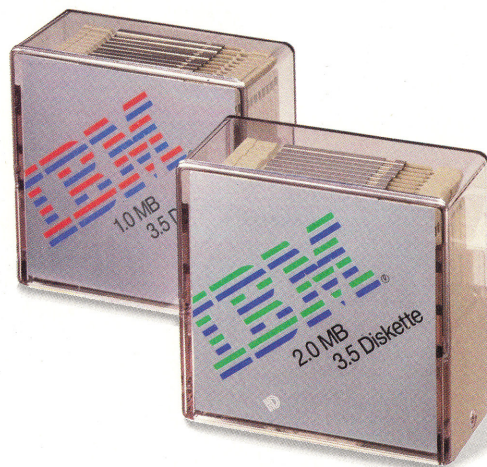

First, the see-through, smoke-tint plas-
tic protects your diskettes from dirt and
lets you locate the diskette you need
without opening a lot of boxes.

That's not all. The case opens to form a
useful stand-up display for your IBM

3.5-inch diskettes. And each of the ten
diskettes is individually wrapped, so
it's protected even after you've opened
the case.

Normally, you might purchase a case
from your computer supplier. But you
don't pay a penny more for our
enhanced version—you get this added
convenience free.

**For part numbers
and other information,
see page 22.**

For increased reliability and
convenient storage at no
extra cost, our uniquely
designed display case is
the best place for your
diskettes.
